

Complete Solutions for Food, Dairy, Ice Cream,
Beverage, Bakery, Seafood, & Pharm Industries.

SLVF delivers cutting-edge solutions
for the **dairy, food, and beverage**
industries, ensuring excellence
in processing, storage, and hygiene
with advanced, reliable machinery.

Choose SLVF as your trusted partner in machinery, and
let us optimize your manufacturing processes with
precision-engineered solutions, driving efficiency, reli-
ability, and excellence to new heights.

Empowering Industries, Transforming Futures.

Introduction.

At **Sri Lakshmi Venkateswara Fabricators (SLVF)**, innovation meets industry excellence. Our diverse range of cutting-edge machinery is meticulously crafted to elevate your manufacturing processes across various sectors. Whether you are in the food, dairy, fruit, seafood, poultry, pharmaceuticals, chemicals, automobile industries, we offer comprehensive solutions that are tailored to meet your unique requirements.

At SLVF, we take pride in delivering precision in every process. Our machinery is designed to meet the highest standards of quality, ensuring reliability, efficiency, and compliance with all industry regulations. We understand the complexities of your operations and work closely with you to deliver solutions that optimize productivity and performance.

SLVF is your trusted partner in driving operational excellence, with innovative, reliable, and efficient machinery that supports your success across a variety of industries.

Our team of experts is dedicated to providing personalized consultation, guiding you through every step of product selection, customization, and seamless implementation.

SLVF – A journey defined by innovation, precision, and an unwavering commitment to excellence. SLVF provides a comprehensive range of products and services that set new benchmarks in the industry. Discover our expansive offerings, meticulously crafted to meet your evolving needs and elevate your business to unprecedented heights.

Services

Explore how SLVF's services redefine support, efficiency, and long-term success for your operations. Our comprehensive suite of services is designed to maximize the value you receive from our solutions.

- Installation and Commissioning
- Annual Maintenance Contract
- Maintenance and Repairs
- Customization Assistance
- Operational Training
- Remote Monitoring and Support
- Upgrades and Modernization

Why Choose Us?

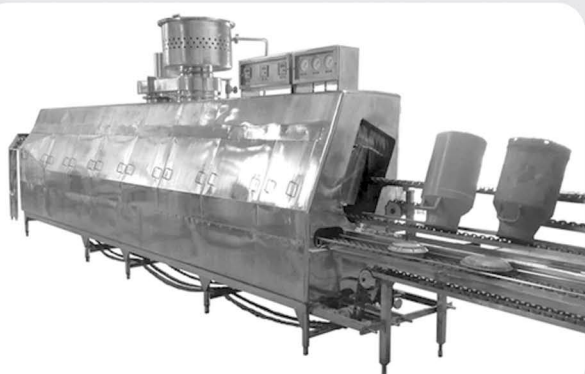

When you choose SLVF, you're not just selecting machinery – you're partnering with a team dedicated to your success. Experience the SLVF advantage, where innovation, quality, and customization come together to elevate your operations.

Crate Washer

The SLVF Crate Washer is designed to automatically clean milk crates used in dairy processing. It utilizes high-pressure water jets combined with rotating brushes to ensure a thorough wash. The system also uses specialized detergents to break down milk residues, ensuring crates are sanitized without manual labor. The washer operates in a cycle that includes pre-rinsing, washing, and sanitizing.

Can Washer

The SLVF Milk Can Washer is designed to clean and sanitize milk cans efficiently. The washer uses a combination of high-pressure water jets and rotating brushes to clean milk cans from all angles. It incorporates an automatic washing cycle that includes soaking, washing, rinsing, and sanitizing to remove all traces of milk and contaminants.

Crate Scrubber

The SLVF Crate Scrubber uses dual rotating scrubbers to clean milk crates efficiently. It removes residues, dirt, and bacteria using high-pressure water. This system ensures thorough sanitation, improving hygiene and reducing contamination risks in dairy operations.

Can Scrubber

The SLVF Milk Can Scrubber utilizes a single rotating scrubber to clean the interior and exterior of milk cans. High-pressure water and detergent solutions remove milk residues and contaminants, ensuring hygienic and efficient cleaning for dairy operations.

CIP (Clean In Place) System

The SLVF CIP System automates cleaning of dairy equipment. Using cleaning agents, hot water, and mechanical action, it sanitizes pipes, tanks, and machines without disassembly. Thorough cleaning, optimizing hygiene and efficiency in dairy processing.
